

Last Chance to bring natural gas to your area!

**Sign up by Jan. 15, 2017
to help bring natural gas
to your community.**

Heating costs can make up to 75 per cent of the annual energy costs for residential, commercial, agricultural and public facilities in Manitoba. If available natural gas is one of the most affordable energy sources.

Now's the time to have your say if you'd like natural gas in your community. Manitoba Hydro is working hard with the Growth and Prosperity Stakeholders Group Inc. to make natural gas available to you by fall 2020.

This would be a major natural gas expansion project; however it will only happen if there are enough customers within your community committing to convert to natural gas.

Your community and Manitoba Hydro need your completed Expression of Interest bid form acknowledging your commitment by 4 p.m. CST on Jan. 15, 2017.

Now is your chance! Sign up and help make natural gas and lower energy costs a reality for you and your community.

If you did not receive your bid form you can download it at www.southcentralnaturalgas.com or contact:
